Adaptation to Habitat

Different plants and animals live in different habitats. What type of habitats do our animals come from? Group them throughout your visit.

Look at the picture and label four of the camel's adaptations, then answer the questions below.

What habitat is the camel adapted to?

What is in the camel's hump?

How are the camel's feet suited to life in its habitat?

How is the camel adapted to coping with sand storms?

One in ten known species live in rainforests. Circle where the main rainforests are in the world.

There are 4 layers to a rainforest. Label these layers and find some species which inhabit the various layers.
