

Rainforest Animals

If you are a member of Children's University **complete the entire workbook** to earn **2 hours**.

How To Use This Pack

Please tell us your:

First Name: _____

And your:

Year Group: _____

This pack is for pupils who have been to the Rainforest Animal Talk at Colchester Zoo.

Work through the pack to earn 2 hours.

When you have completed the workbook please send all the pages including this one and any additional pages to:

Colchester Zoo via email to education@colchesterzoo.org or via post to:

The Education Department, Colchester Zoo, Maldon Road, Stanway, Colchester,
ESSEX, CO3 0SL

If sending via post, please ensure you provide an email address for us to send you the stamps for your hard work!

What Did You Discover?

Summarise the session in no more than 2 sentences.

Write down 2 cool facts from the session.

If there was anything you want to know more about, develop a question and write the answer.

Question:

Answer:

You Choose

Imagine you are an explorer and you are trekking through the rainforest for the first time. Think about what you will see and how it would feel to be there.

Being as descriptive as you can, write **1** of the 2 options:

1. A poem
2. A diary entry

Forests Around the World

In the session you looked at the tropical rainforests but there are many types of forests.

Find **2** other types of forests and write a description for each forest.

Forest 1:

What is this type of forest called? _____

Description:

Forest 2:

What is this type of forest called? _____

Description:

Where are they found?

In the session you saw the different levels of the rainforest and discovered some of the animals that live there.

Below are pictures of other animals that live in rainforests. Draw a line to the layer of the rainforest they can be found in (can be more than one).

Komodo dragon

Emergent Layer

Rhinoceros hornbill

Canopy Layer

Common marmoset

Understory Layer

Chimpanzee

Forest Floor

Rainbow Lorikeet

True or False?

Circle either true or false for your answer.

- Orangutans cannot grip with their feet:

True or False

- Eagles can be found living in the emergent layer:

True or False

- Sun bears only eat bugs:

True or False

- Pygmy hippos can swim:

True or False

- Poison dart frogs are brightly coloured to warn others they are poisonous:

True or False

- Anaconda's hide under the water waiting to catch its prey:

True or False

Animal Role Call

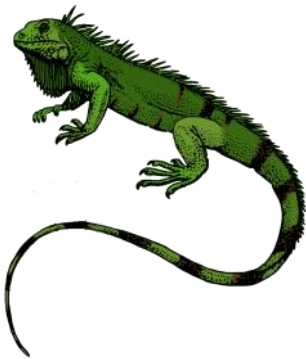

Using the IUCN website find out the maximum number of each of the animals below and put these numbers into a graph on the next page.

Helpful tips: using the scientific (Latin) name will make your search easier. On the IUCN website you will find a section on the population. This is where you will find the number of each animal.

Visayan spotted deer

Rusa alfredi

Green iguana

Iguana delicatissima

Victoria crown pigeon

Goura victoria

Sumatran orangutan

Pongo abelii

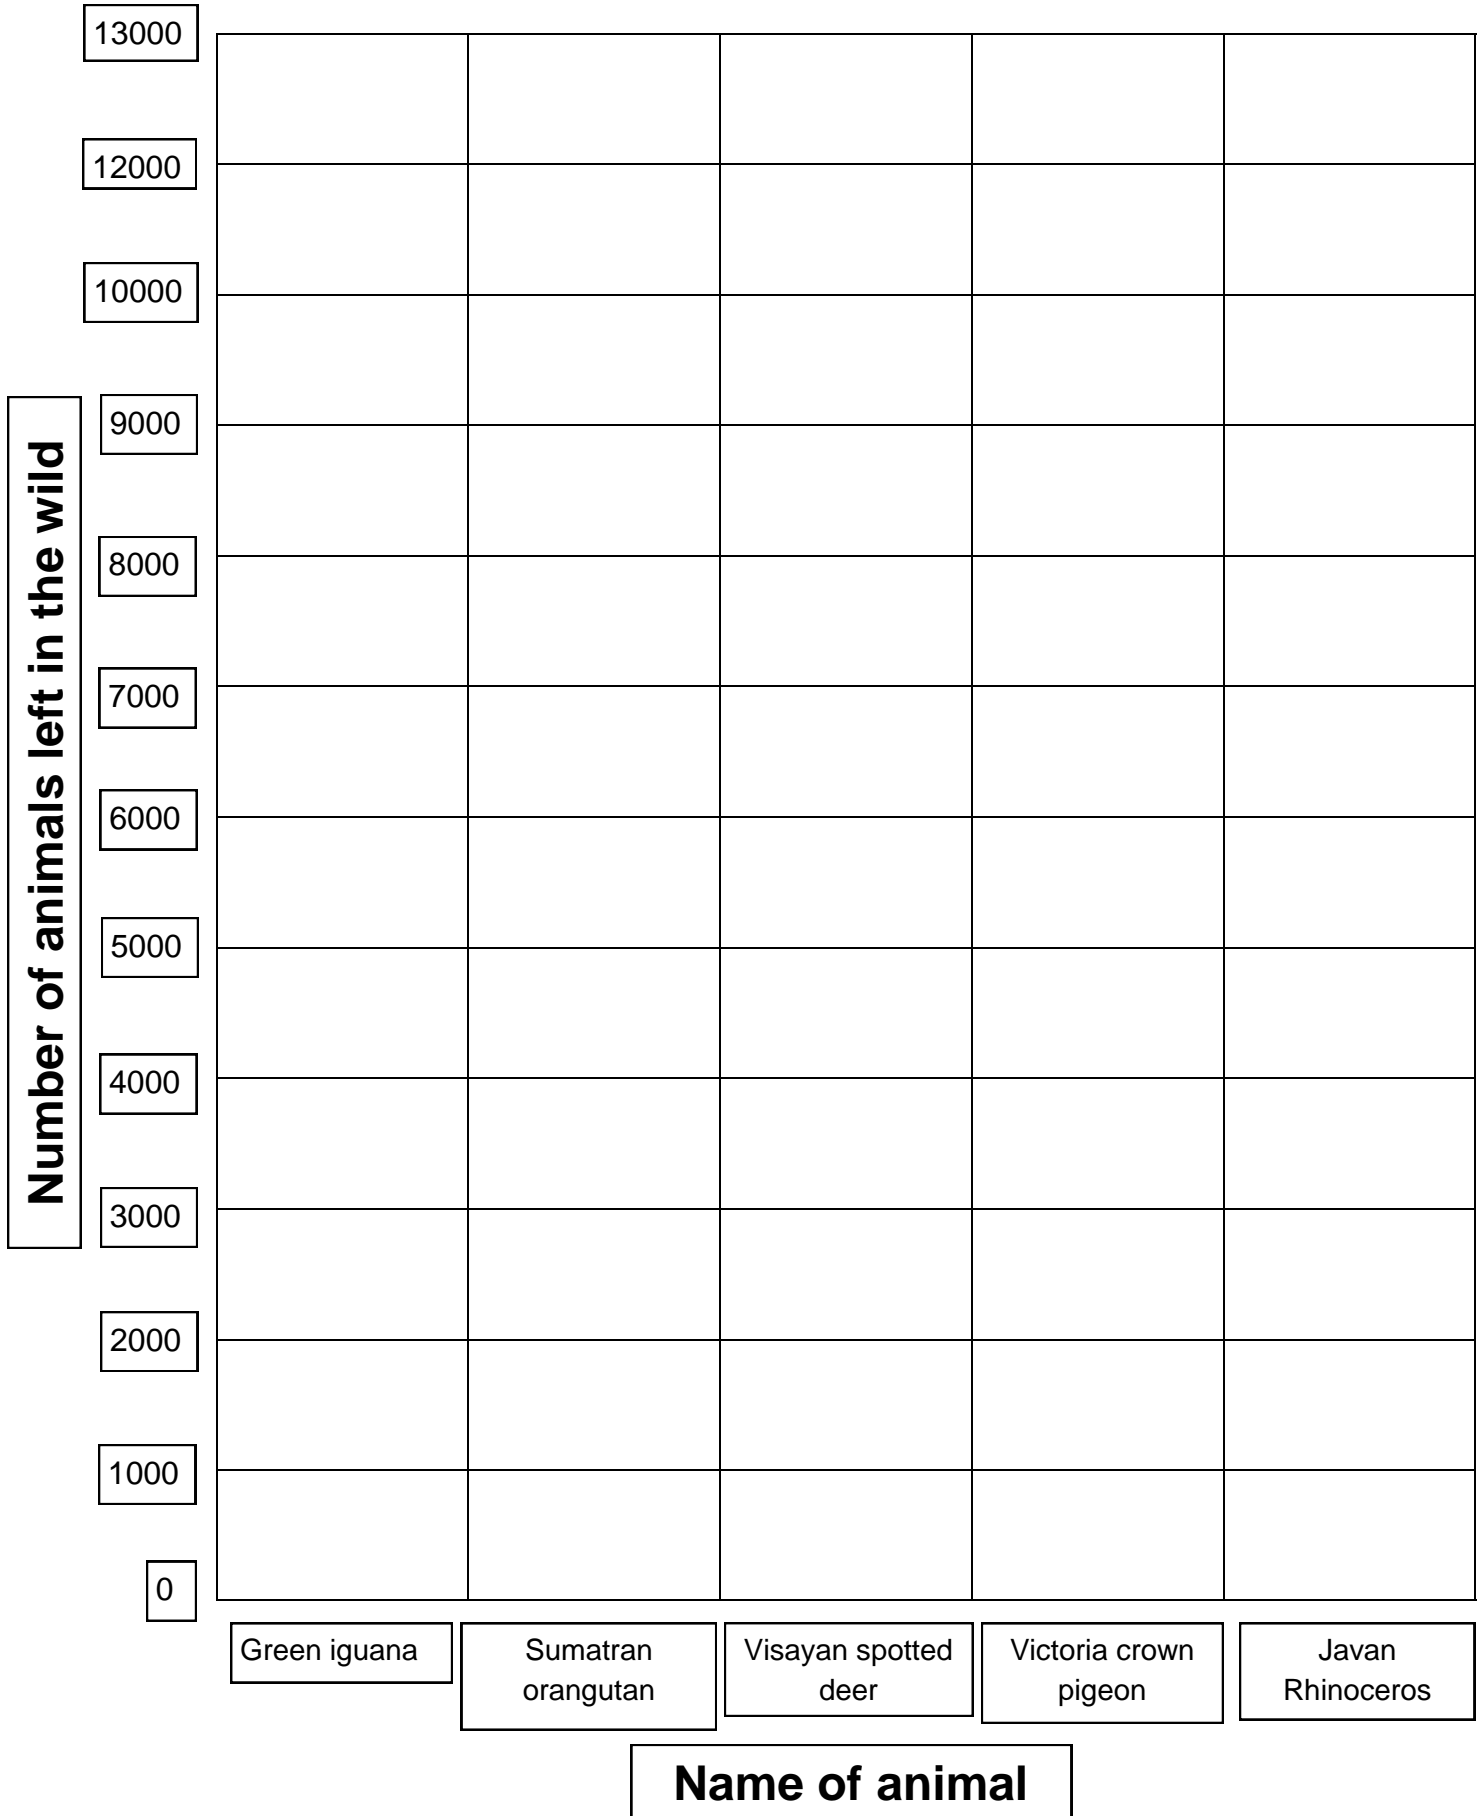

Sumatran rhinoceros

Dicerorhinus sumatrensis

Animal Role Call

Title: _____

Create a Collage

The rainforest is home to many types of animals but many types of plants are found in rainforest too. Create a collage of some of the plants (trees, flowers, shrubs, vines, to name a few) in the box below. The collage can be made up of pictures, drawings or a mixture of both.

A large, empty rectangular box with a black border, intended for students to create a collage of rainforest plants. The box occupies most of the page below the instructions.
